

16 ○

The image consists of two side-by-side panels showing a microscopic view of a textured surface. The surface is covered with numerous small, circular, raised features, possibly pores or cells, arranged in a somewhat regular pattern. The left panel has a green label '16' and a green circle symbol '○' in the lower-left corner. The bottom of both panels shows a distinct, fibrous or striated texture, likely representing a different layer or material boundary.
